

Battery Backup

REDD™

REDD Battery Backup

Width - 10.5"

Height - 14"

Depth - 7.5"

Specifications

- 1 Year Limited Warranty
- Automatic Charger/
Tender
- Alarms (Audio + Visual)
- Intended to provide at
least one full cycle

The Redd™ Battery Backup integrates seamlessly with the Redd™ Motor System to provide a power source in the event of power loss to the building. An integrated charger and battery tender ensures that your battery will be fully charged to provide at least one full operating cycle* when you need it the most. Low power warnings are provided to alert you in the event of a faulty or declining battery.

***One full cycle represents one opening and one closing of the system. Battery backup capability is limited by door size, weight, and capability of battery. Battery should be replaced every 12 months for best performance.**
