

Touchscreen Control

Feature Packed Touchscreen

The Renlita touchscreen control station displays easy, user-friendly, and intuitive controls that can be locked behind a custom PIN code for high security applications. Designed for easy installation and seamless integration into any interior design or application. Control of the system can also be integrated with 3rd party building automation systems using RS485 connections at the motor controller box.

Specifications

- Proprietary quick connect to control box
- Full-color touchscreen
- Optional PIN code lock
- Single gang wall plate size
