

POWDURA 4000 COATINGS

Designed to provide substantial resistance to abrasion, impact, scuffing and scratching, Powdura 4000 coatings deliver a superb finish and long-term durability. This proven technology withstands harsh elements from UV rays to high heat and humidity. Powdura 4000 coatings are designed to meet or exceed AAMA 2604 specifications, giving your structure's metal products excellent gloss retention and weathering resistance.

WHEN EXTRA CORROSION RESISTANCE IS NEEDED

We offer Powdura Super Durable Primer (RAS8-80000) which resists damage from harmful UV rays and provides an extra barrier to aid in corrosion prevention. When used with Powdura topcoats and applied over properly pre-treated aluminum, the coating systems are designed to meet or exceed their respective AAMA specifications for residential and commercial applications.

For projects using steel substrates that will be exposed to harsh elements, we offer highly corrosion resistant primers such as Epoxy Primer (EAS6-00K33) and Zinc Epoxy Primer (EAS6-00K44) in a unique dry-on-dry OneCure primer, and (AAMA qualified) topcoat application. Our topcoat offers the best of both worlds – a crosslinked system built for corrosion resistance as well as color and gloss retention that will give your product an excellent architectural finish built for long-term durability. Please contact us to learn more.

ABOUT RENLITA CUSTOM OPENING SOLUTIONS

Renlita specializes in highly customizable vertical opening systems engineered specifically for your project. Our team of highly trained engineers and skilled craftsmen have years of experience designing and creating incredible doors, windows and walls that lift at the touch of a button.

High-quality components and durable powder-coated finishes protect your investment, and seemingly endless color, glass and cladding options make your opening truly one of a kind. Standard color options are listed here and custom colors or color matches are available as well.

POWDURA® ARCHITECTURAL ALUMINUM COATING SYSTEMS

Powdura powder coating systems for exterior and interior metal building products offer the breadth and flexibility you need for your finishing requirements. Powdura coating systems possess excellent abrasion, mar, scratch and impact resistance to withstand the harshest environments.

POWDURA 4000 ALL PRODUCT TYPES ARE FOR INTERIOR AND EXTERIOR USE

Powdura 4000 coatings are our standard coatings formulated with super durable polyester resins and solar-reflective pigments known to reduce heat buildup and leave painted metal cool to the touch. This coating system provides excellent gloss retention and is available in TGIC and TGIC-free formulations. Applications include: residential and non-monumental structures, as well as heavy commercial use for windows, doors, fencing, railings, stairwells, handrails, louvers, skylights, indoor atrium areas, high traffic areas and store fronts.

	POWDURA 4000
AAMA Spec	2604
Film Thickness ASTM D7091	1.8 to 3.0 mil
Specular Gloss at 60° ASTM D523	30-90 units
Humidity ASTM D2247	3,000 hours aluminum
Acid Salt Spray ASTM G85 Annex 5	N/A
Salt Spray ASTM B117	3,000 hours
Weathering	5 years exposure, 45° South Florida
Fade ASTM D2244	Max 5ΔE
Chalk ASTM D4214	Chalk maximum 8 rating
Gloss ASTM D523	Gloss > 30% retention

POWDURA SUPER DURABLE ARCHITECTURAL RAL AND SPECIAL EFFECT COATINGS

We offer a broad range of high-gloss and satin finish RALs ranging from RAL 1001 to RAL 9018 that cover a wide array of colors for your project needs as well as other special effects metallics and textures that are trending colors in the metal architectural building products market. Our super durable polyester architectural RALs and special effect colors are formulated for excellent color and gloss retention to meet the weathering performance of 2604 requirements. Listed below are our most popular in-stock colors. Please contact the Renlita sales team for more information on RAL and special effect colors.

Sky White
