ABOUT RENLITA

Renlita is the industry leader in custom doors, windows, and operable walls that transform architectural designs and define interior and exterior spaces. Customize one of our time-tested models or design your own one-of-a-kind, "never been done before" masterpiece. Our Design Consultants guide you through the creation of specially designed steel or aluminum vertical openings that blend in or stand out. Come see why we're the clear-cut, safe, and trendsetting leader in vertical opening and custom metal architectural pieces.

CONCEPT TO COMPLETION

Renlita provides a turnkey solution, including specified finish, glass or cladding, and installation. Every project is unique and built to meet your design needs. Our concept to completion service provides customers with confidence that all aspects of the project are properly executed.

STEP
01

CONCEPT

Our Design Consultants listen to your ideas and walk you through the process of designing the window, wall, door, or special project you've been envisioning.

STEP
02

CREATE

Renlita's engineers are the best in the business. We specifically design all parts of the system to match your design intent and provide drawings and details for your unique project.

STEP
03

CRAFT

Every single inch of your project is as important to us as it is to you. Each custom project is carefully handcrafted by a team of specialized artisans with pride in the USA.

STEP
04

COMPLETE

The most exciting part is bringing your project across the finish line! Renlita's factory trained technicians complete your custom project with expert installation and service.

SOVEREIGN

Multiple panels stack up accordion-style to the interior with zero wasted space in your opening. Perfect for spaces where interior tracks would distract from your design or cover up lighting, sprinklers or HVAC systems. This system is constructed from aluminum and is suitable for commercial, retail, and residential applications. The Sovereign system is balanced by the use of torsion springs connected to a rotating shaft. The ends are attached to cable drums that lift/lower the curtain. The Sovereign creates a flexible space and an efficient space management solution.

OPTIONS & FEATURES

Battery Back Up

The REDD® Battery Backup provides a secondary power source in the event of power loss.

Touch Screen Control

Our sleek touchscreen has plug-and-play technology and can be configured with a multi-digit code for security.

REDD LD Motor

We designed a motor exclusively for the Sovereign system. These 110V motors are ultra-quiet, light duty, and only available from Renlita.

REDD Alert®

REDD Alert® is our integrated safety system that identifies anything impeding door travel to keep your system safe.

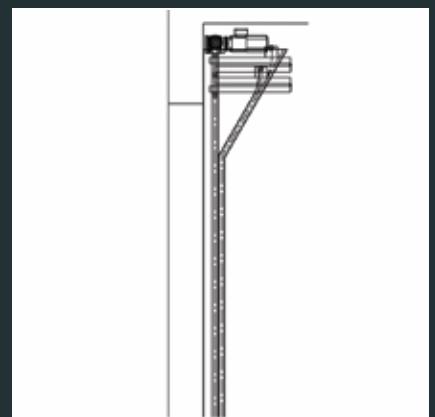

Screen & Shade Options

Many of Renlita's systems can be fitted with customizable motorized insect screens and sunshades.
